

Central Laboratory

Location: Bayport Industrial District,
Pasadena, TX
(on-site at GCA's Bayport Facility)

Operation: Full-service NELAP-accredited
testing laboratory

Average Volume: 400 samples/day

GCA's individual facility laboratories were consolidated into a single Central Laboratory in 1991. While the facilities still perform some basic analysis, the heavy lifting is accomplished at the Central Laboratory, which processes 400 samples daily. Test results are available the same day, versus a one-week turnaround for most commercial facilities.

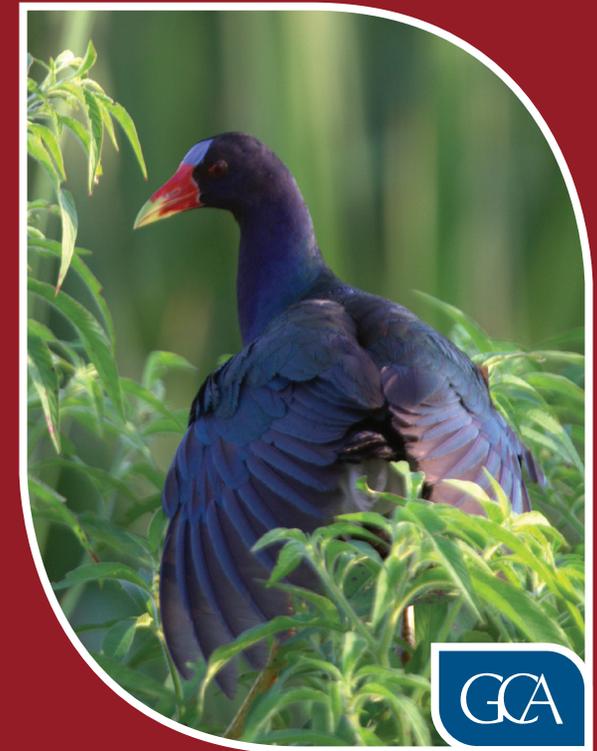

The Central Laboratory tests all GCA streams daily for total organic carbons, total suspended solids, metals, chemicals and other materials to ensure that incoming wastewater may be processed effectively and to provide data for regulatory compliance reporting.

The state-of-the-art facility employs spectrometry, mass spectrometry, electron capture detection, flame ionization, atomic absorption and inductively coupling plasma equipment along with other equipment and instruments, much of it automated, to perform its mission. The lab employs a web-based Laboratory Information Management System that enables GCA facilities and other customers to rapidly access test status and results and performs automated quality assurance for sample analysis.

In addition to its work for GCA facilities, the Central Laboratory provides analytical services to external municipal and industrial organizations. The lab is accredited by the National Environmental Laboratory Accreditation Program (NELAP) and the Texas Commission on Environmental Quality (TCEQ). The accreditation is awarded by TCEQ based on the information submitted utilizing the NELAP quality system.

Gulf Coast Waste Disposal Authority

Protecting the waters of the State of Texas through environmentally sound and economically feasible regional waste management practices

Gulf Coast Waste Disposal Authority

The Gulf Coast Waste Disposal Authority (GCA) has successfully fulfilled its mission of protecting the waters of the State of Texas since 1969. GCA continues to play a significant role in improving the water quality of Galveston Bay and the Houston Ship Channel; in promoting economic development in Texas through professional, cost-efficient, environmentally responsible treatment of regional industrial and municipal wastewater streams; in financing solid waste and industrial sewage pollution control equipment for Texas industries and issuing industrial development bonds for manufacturers in Galveston, Harris and Chambers counties.

GCA's operations include: several regional industrial wastewater treatment facilities serving over 80 industrial customers in the Houston - Gulf Coast area and in the City of Odessa; a regional municipal wastewater treatment facility serving the City of Friendswood, a small part of Houston, and two Municipal Utility Districts; a municipal wastewater treatment plant serving the Cedar Bayou Park Utility District; a receiving station for trucked-in non-hazardous wastewater; a landfill for non-hazardous industrial solid waste; and a Central Laboratory accredited by the National Environmental Laboratory Accreditation Program (NELAP) that tests incoming wastewater, treated water before discharge and samples from outside customers.

In 2013, the Texas Legislature expanded GCA's purview to permit the treatment of water that falls outside of industrial wastewater settings. The bill granted the Authority the same powers with regard to the acquisition, construction, and operation of such water systems that it has with regard to disposal systems. Water systems covered by the legislation include pipelines, conduits, canals, pumping stations, force mains, plants, storage, and other water treatment, collection, disposal or distribution facilities.

Central Lab Customer Benefits

- NELAP-accredited, full-service laboratory operates 365 days/year;
- Broad sample analysis capabilities;
- Rapid analysis turnaround time;
- Web-based Laboratory Information Management System provides quick access to test results, analysis quality control;
- Sample kits, pickup/delivery services provided by Lab.

Why communities and industries contract with GCA

GCA offers significant advantages for municipal and industrial customers:

Industrial

- Favorable economies of scale save money and improve efficiency;
- Industries avoid the cost of installing and operating extensive treatment systems;
- GCA can provide tax-exempt financing for pipelines and solid waste facilities;
- GCA fees are an operating expense, rather than a capital expense;
- GCA responsible for permits and dealing with regulators;
- GCA staff are experts in wastewater treatment and industrial solid waste management.

Municipal

- Favorable economies of scale save money and improve efficiency;
- Infrastructure financed by GCA preserves municipalities' capacity to issue bonds for other purposes;
- GCA fees are an operating expense, rather than a capital expense;
- GCA responsible for permits and dealing with regulators.

Many of the same advantages of working with GCA to provide regional municipal and industrial wastewater treatment solutions also apply to water treated under the Authority's expanded scope granted by the Texas Legislature in 2013.

Core values

GCA's core values guide every aspect of operations:

- **Stewardship** of the environment and of the health and safety of employees, customers and neighbors;
- **Communication**—open, honest, frequent—with all stakeholders;
- **Reliability**—ensuring that our operations are safe, compliant and cost effective;
- **Integrity** of our staff who operate in a simple, clear, transparent and honest manner;
- **Planning** to ensure continuity of service, innovation, sustainability and financial responsibility; and
- **Teamwork** to foster trust, commitment, enthusiasm and innovation.

What makes GCA function so well are the dedicated employees, managers and board members who do their very best, every day, to protect the waters of the State of Texas and work with our customers and government officials to help foster economic development that is the envy of the nation.
